2014 - 2017

PROJECTS

- **Work Company Website:** This is a landing page I made for a french work company. It includes many forms sent to the company by email and information about the company. *Link [here](#).*
- **Event Website:** This is a site where you can find all the information about an event (such as a wedding). It includes a confirmation form about your participation in the event as a guest. The organizer can access the list of responded guests and modify it. *Link [here](#).*
- **GameZone:** This is a video game e-shop with both client and manager sides. Clients can navigate products and make orders. Managers can manage the products and confirm orders. *Link [here](#).*
- **Tic Tac Toe:** Game app created with React Native and TypeScript. *Link [here](#).*

More projects on my [GitHub](#) and [Portfolio](#).
